

HEPA SOLAR is an innovative German company and has set itself the task of simplifying access to renewable energy and making the green footprint accessible and affordable for practically everyone.

Whether for the big or the small wallet, from now on everyone can make their contribution. Whether with just one or many modules, particularly attractive for installers due to the minimal installation effort.

HEPA PRO 400W

SELF-SUFFICIENT POWER SYSTEM

25.2%
EFFICIENCY
AND 30-YEAR
PERFORMANCE
GUARANTEE

READY TO USE
IN 5 MINUTES

HEPA PRO 400W SELF-SUFFICIENT POWER SYSTEM

The innovative HEPA PRO complete power plant is equipped with one of the **highest quality industrial glass-glass HJT panels with 25.2% efficiency and a 30-year performance guarantee**. Installed in a pop-up frame that is unique on the market, the angle of which can be adjusted for the optimal inclination with just 2 movements.

The HEPA PRO complete power plant is **fully assembled, including a pre-installed micro-inverter and 5m connection cable** with SCHUKO plug, delivered in a box and can be set up and ready for use in 5 minutes.

It only has to be plugged into the nearest socket and, under the right weather conditions, **delivers 400 watts directly into your home network**. This means that your electricity meter will run slower from that point and the power consumption will decrease. Just place it in the garden, on top of your garage/carport or where-

ver you find space and **start reducing your electricity bills immediately**.

The **high-quality, anodised aluminum frame** can be weighted down with paving slabs or mounted on the ground or against a wall with 4 screws. All the required drillings and the required wall anchors are already there.

Thanks to the **smart plug & play system**, you can **easily expand the system module by module**, without any additional cable installation. A maximum of 2 modules can be interconnected for connection to a socket. For larger installations that have to be placed in the control cabinet, **up to 12 modules** can be connected in series within a few minutes. We recommend an even distribution over the 3 phases.

Thanks to the **built-in WIFI function** on the micro-inverter, you can display the power at any time with the free Solarman app on your smartphone.

A yellow circle with a white WiFi symbol inside. The text 'INTEGRATED WIFI FUNCTION' is written below it.

HIGHEST QUALITY FOR HIGH EFFICIENCY

A yellow circle with a white plug symbol inside. The text 'CONNECT UP TO 12 MODULES IN SERIES' is written below it.

A photograph of a smartphone displaying the Solarman app. The screen shows '400W', '230V', and '50.0Hz'. The text 'EASY MONITORING WITH OUR FREE APP' is overlaid at the bottom.

A close-up of the solar panel's frame, showing a black insert plate with small holes for water drainage. The text 'INSERT PLATE FOR WEIGHTS WITH WATER DRAINAGE HOLES' is overlaid at the top.

Key data

- Easy wall mounting
- Adjustable tilt angle
- Including insert plate for pavement slabs
- Pre-wired with SCHUKO plug
- Microinverter pre-assembled
- Simple plug and play expansion
- Noble design / full black module with black anodized aluminum frame
- 400W HJT glass-glass module, 25.2% efficiency
- Low costs due to easy installation
- Only partial shutdown in the event of shading

Included

- Complete power system
- 5 meter connection cable with SCHUKO plug
- Wall anchor for wall mounting
- Insert plate for weights

A photograph of the complete power system, including the solar panel, microinverter, and connection cable, all packaged in a black box.
